# MEGA-TEK<sup>®</sup>

Attn: Customer Relations:

Hi! Just wanted to send you these pictures of my horse. He was kicked in the chest last May. You can see what happened - he had some time off. Anyway, the hair to his chest just was not growing back in. Well, guess what - one day in the mail I received a free sample of your shampoo along with product literature. I liked the shampoo so much that I called up one of your distributors and ordered a gallon of it, a gallon of your rehydrating spray, and just thought I'd give your Mega-Tek Cell Rebuilder a try. The results were nothing less than miraculous - by the third day of using this product (the Mega-Tek) on my horse he had a complete coat of hair on him. My friends were astonished at the results. When you state that the product will "accelerate hair growth up to 50% faster," it isn't true - it accelerates it much faster than that - at least on my horse! I have also been using this product on his hooves, and it has made a difference - he made it over two weeks this time before having to be reset! (just so you know I'm really serious - he is an endurance horse - and I really put his feet to the test - I've had people comment that his feet have never looked so good). Thank you for such great products! My horse's hair, coat, mane, tail and hooves have never been better.

Sincerely,

*Karen Chaton*
